---

excellent course

---

excellent faculty

---

insight into things you are shielded from as an SpR

---

thank you for your hard work in delivering a course that was relevant to my own experience. In particular thank you for your honesty in presenting your own job plans / complaints which was very refreshing

---

course was perfectly suited to my level (peri-consultant) of training. Preferred this course to the other generic type courses. Definitely keep it going

---

great atmosphere, excellent advice from qualified and very wise senior clinicians. Thoroughly enjoyed. Significant expertise to augment sessions

---

provide paper rather than e-certificate

---

the presence of industry is markable (commercial) better to be replaced with other topics

# Comments from delegates 1

---

excellent course, a real eye opener

---

very useful course, all that a consultant needs. Thanks to the faculty for sharing their own experience

---

excellent workshop. I would definitely recommend it to my colleagues

---

Perhaps a buffet option for lunch? [instead of sit down meal]

---

BRILLIANT lectures from the 2 course organisers and by Prof Canter. Extremely well run by friendly faculty with open and specific information. EXCELLENT. Thank you.

---

Excellent content, speakers, diversity and specificity of talks. Urology heavy audience meant some of the discussion tended to be Urology specific but generic answers

---

Rooms (lecture room 2nd day & accom) were a little cold.
