Nothing

Excellent day with small group and engaging speakers

Excellent program. Very practical information.

Great program and faculty. The discussion was fruitful. I would like to attend such courses in the future. Today in few hours I learnt more than what I learnt in any other course.

Was very helpful and well organized presentation and talk, thanks to all the consultants and the organizers for making this top notch experience and course. So much appreciated

Excellent course

### What would you like to see changed in Advanced Endourology Courses?

7 responses

More practical and cases

More discussion in laser setting for stone cases

Please add information on laser settings

A small talk on how to practically setup and run a metabolic stone clinic

A presentation on the instruments from the different brands

I would like to have hands on experience later on, that would be more helpful
